- Construction & Installation**
- Each unit shall be constructed at the location and elevation according to the plans shown on the approved drawings. Any modifications to the elevation or location shall be at the discretion of and approved by the Engineer.
 - If the Filter® unit is to be installed, the top slab must be placed on the base using the 2-4 wood provided to prevent any contamination from the site. All internal fillings supplied (if any) must be left in place as per the delivery.
 - The unit shall be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit.
 - Outlet connections shall be aligned and sealed to meet the approved drawings with modifications necessary to meet site conditions and local regulations.
 - Once the unit is set, the internal wooden forms and protective mesh cover must be left in place. The top lid should be sealed into the box before backfilling, using a non-shrink grout, heavy rubber or similar waterproof seal. The boards on top of the lid and boards sealed in the unit's throat must NOT be removed. The Supplier (Manufacturer) should be performed in a careful manner, following the instructions for the unit. The unit should be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit.
 - Curb and gutter construction (where present) shall ensure that the flowline of the Filter® unit is at a greater elevation than the flowline of the system entrance or outlet. The unit shall be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit.
 - Final Filter® unit must receive adequate attention to ensure survival of the living gutter flow or through the two gates.
- Installation**
- Activation of the Filter® unit is performed ONLY by the Supplier. Therefore, it is the responsibility of the Supplier to provide the necessary instructions for the unit. The unit shall be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit. The unit is to be placed on a compacted subgrade with a minimum 6-inch gravel base matching the final grade of the curb line in the area of the unit.
 - Annual scheduled maintenance consists of a minimum of (2) scheduled visits. The visits are scheduled annually, the spring visit aims to clean up debris and loads that may be included on the unit. The fall visit helps the system by removing excessive leaf litter.
 - Activation includes installation of plants and mulch layers as necessary.
- Included Maintenance**
- Each correctly installed Filter® unit is to be maintained by the Supplier, or a Supplier approved contractor for a minimum period of 1 year. The cost of this service is to be included in the price of each Filter® unit. Extended maintenance contracts are available at extra cost upon request.
 - Annual scheduled maintenance consists of a minimum of (2) scheduled visits. The visits are scheduled annually, the spring visit aims to clean up debris and loads that may be included on the unit. The fall visit helps the system by removing excessive leaf litter.
