Re: Hunter Viaduct Reconstruction
City of Roanoke
Roanoke, Virginia
HSMM Commission No. 2894A

Dear Mr. Perdue:

The purpose of this letter is to inform City of Roanoke's Utility Line Department of the proposed demolition and reconstruction of the Hunter Viaduct over railroad tracks of Norfolk Southern in the City of Roanoke. We are submitting for your review one set of Conceptual Design Plans identifying the proposed construction along with two copies of an Existing Utility Plan.

This project involves the removal of the west ramp (old Jefferson Street leg), replacement of steel girders and concrete deck (including widening) of southbound Williamson Road and replacement of the concrete deck of northbound Williamson Road. It is our intent to maintain two lanes of traffic at all times during construction.

Please review and verify your utility information as shown on the plans. Please indicate changes you are aware of and return a copy of the utility plan to us. HSMM's intent is to identify all utility ownership, above and below ground, to determine any utility conflicts with the proposed construction.

If necessary I would be happy to arrange to meet with you at the site to address any comments or questions you may have; otherwise, please feel free to contact me or Steve Chapin at (703) 857-3100.

Very truly yours,

HAYES, SEAY, MATTERN & MATTERN, INC.

Gary Maji, P.E.
Bridge Engineer
