CIVIL

EROSION CONTROL PLAN

CS105

NOTES THIS SHEET:

- SEE SH CS601 FOR DIMENSIONAL AND CONSTRUCTION INFORMATION PERTAINING TO DRAINAGE AND E&S CONTROL MEASURES.
- SEE SH CS502 FOR E&S CONTROL DETAILS.
- TEMPORARILY EXTEND CULVERT WHILE SEDIMENT TRAP IS IN PLACE WITH 15" RCP. PROVIDE WATER-TIGHT JOINT AT CONNECTION WITH EXISTING. ANCHOR PIPE TO RESIST FLOTATION.
- THE TEMPORARY DIVERSION IS A PERIMETER CONTROL AND SHALL BE INSTALLED BEFORE ANY OTHER LAND DISTURBANCE. FINAL GRADING OPERATIONS MAY REQUIRE THAT THE DIVERSION BE TEMPORARILY OFF-LINE ALONG THIS SEGMENT. INSTALL SILT FENCE ABOVE DIVERSION BEFORE GRADING UP-HILL SO AS TO CONTROL SEDIMENT FROM THE CUT SLOPE. RE-CONSTRUCT DIVERSION AFTER GRADING IS COMPLETED. SILT FENCE SHALL REMAIN UNTIL CUT SLOPE IS STABILIZED.
