

Greenfield Tank Property Survey

June 27, 2006

* Survey tank lot for pins and use pins to stake yellow highlighted property line from pin #4 to the roadway.

* If angles cannot be turned with the total station, send in property corner points and we will calculate the needed stakeout coordinates in the office.

* Stakeout points will be sent back quickly and will need to be staked before leaving the job site.

Note: If angles can be turned, all work can be done on an assumed datum.
