SCHEDULE OF REINFORCING STEEL

Concrete in Superstructure shall be class "A" in substructure class "B".
Stations, elevations and dimensions shown on this plan are approximate and subject to change. Details in general except for width of roadway shall conform to those shown on Standard Plan C-18.
All dimensions required for the accurate compilation of quantities shall be measured before any concrete is poured.
Foundation shall be approved by the Engineer.
Cost of removing existing concrete, raising existing slab and maintaining traffic during construction shall be included in the lump sum bid for "Maintaining Traffic & Raising Ends."
