J. M. Turner & Company  
137 Campbell Avenue, S. W.  
Roanoke, Virginia

Gentlemen:

Referring to yours of the 9th in response to my letter of September 20th. The meter pit is shown for the Delray Street Station on Sheet 2 and is in the extreme upper lefthand corner, and now calls for a bottom with a 3" gravel floor.

Addendum No. 2, a part of the contract papers, calls attention to the omission on the Crystal Spring plans for a similarly located meter pit. We desire this pit also to have the additional depth of coarse stone.

Very truly yours,

Engineer in Charge  
of Construction
