Century Electric Company
St. Louis, Missouri

Gentlemen:

We recently purchased a Gardner-Denver Pump equipped with your motor Model GCM22507-JC5-1K, Spec. No. 8887, Serial No. 8AB47312, 5 HP, 60 cycle, 230 V, 24 A.

This is a single phase capacitator motor, and we are having a lot of trouble with capacitors burning out. A local electrician lays it to dampness. Your comments would be appreciated.

I would like, also, to have a wiring diagram of this motor.

Yours truly,

G. H. Ruston
